

Mahmoud Ahmed

Full Stack Developer — Next.js | TypeScript | React

Location: Sidi-Bishr, Alexandria, Egypt **Email:** mahmoud.ahmed.25.9.24@gmail.com **Phone:** +201096389518

LinkedIn: linkedin.com/in/mahmuud **GitHub:** github.com/ma-hmuud **Portfolio:** ma-hmoud.vercel.app

Summary

Results-driven Junior Full Stack Developer with 1+ year of experience building scalable web applications using the Next.js/React ecosystem and Node.js. Proven ability to architect complex systems, optimize database performance, and collaborate effectively in agile environments.

Education

Bachelor of Data Science, Faculty of Computer and Data Science
Alexandria University | **CGPA: 3.6/4.0**

Oct 2022 – Jul 2026

Experience

Shafei Vehicle Management App - Software Developer (Freelance project) | [\[Live Demo\]](#)

Apr 2025 – Aug 2025

- Architected and developed RESTful APIs using Express.js 5, PostgreSQL, Redis, and Drizzle ORM, handling 500+ daily API requests.
- Designed and optimized 10+ database schemas for vehicle tracking, user management, and automated notifications.
- Integrated third-party services: AWS S3 for file storage, SendGrid for transactional emails, and Wasender for WhatsApp notifications.
- Collaborated on frontend development using Next.js 15, React 19, Tailwind CSS, and Radix UI, improving page load time by 40%.

.NET Web Trainee - Digital Egypt Pioneers Initiative

Apr 2024 – Oct 2024

- Developed full-stack web applications using ASP.NET Core MVC, Web API, and Entity Framework Core.
- Co-led a team of 3 developers to build an educational platform serving 200+ users.
- Optimized SQL Server database queries, reducing page load times by 30% through indexing and refactoring.

Projects

Graphora - Full Stack Developer | [\[Source Code\]](#) | [\[Live Demo\]](#)

Apr 2026 – June 2026

- Architected a full-stack graph visualization monorepo using Next.js, NestJS (GraphQL), and Python computation workers.
- Engineered background workers (NetworkX, NumPy) orchestrated via BullMQ for heavy graph computations.
- Built a scalable PostgreSQL backend with Prisma ORM, integrating AWS S3 storage and Better-Auth.

Swift Shift - Full Stack Developer | [\[Source Code\]](#) | [\[Live Demo\]](#)

Feb 2026 – Apr 2026

- Developed an employee scheduling platform facilitating role-based workflows, shift requests, and availability tracking.
- Built end-to-end type-safe APIs using tRPC and TanStack Query, integrating Next.js with PostgreSQL via Drizzle ORM.
- Created dynamic, responsive calendar interfaces utilizing FullCalendar and Radix UI.

MA Drive - Full Stack Developer | [\[Source Code\]](#) | [\[Live Demo\]](#)

Jan 2026 – Feb 2026

- Developed a full-stack Google Drive clone with user authentication, hierarchical folder management, and file uploads.
- Implemented secure authentication using Clerk OAuth2, file uploads via UploadThing, and database operations with Drizzle ORM.
- Deployed a responsive Next.js application to Netlify with an automated CI/CD pipeline achieving 99% uptime.

Volunteer Work

Instructor & Content Writer, HackerRank Campus Club

Feb 2024 – Dec 2025

- Mentored 50+ students in Java and problem-solving, and authored 5+ Java OOP workshops.

Skills

Languages: TypeScript, JavaScript, Python, C#, SQL

Frontend: React, Next.js, TanStack Query, Tailwind CSS, shadcn/ui

Backend: Node.js, NestJS, Express.js, ASP.NET Core, REST, GraphQL

Databases & ORM: PostgreSQL, SQL Server, Redis, Drizzle ORM, Prisma

DevOps & Tools: Git, Docker, AWS S3, Vercel, Netlify, BullMQ, OAuth2
